SHUTTLES

Matches will be played with **VICTOR** and **FZ Forza** feather shuttles in some divisions and **carbon hybrid shuttles** in others.

About carbon hybrid shuttles:

A hybrid shuttle is a modern type of badminton shuttlecock, where the frame is made of carbon ribs, while the "feathers" are made from a durable, feather-like plastic material. This combination creates a shuttle that behaves like a traditional feather shuttle in terms of flight and feel, but is more robust and consistent in its trajectory.

The purpose of using hybrid shuttles is to combine the best of both worlds – the natural flight and precision of feather shuttles, along with the longer durability and stability of plastic shuttles.

IMPORTANT: All shuttles must be returned to the referee's table before a new shuttle can be issued.
